

MEDIA STATEMENT

New Support Site in Logan

The Centre for Women & Co. work on the frontline every day empowering women with the resources and support they need to stay safe in an abusive relationship or home and rebuild their lives.

To help CFW continue the crucial work we deliver everyday, the Miles government has invested \$3 million towards the purchase of a new home in Springwood. Here, The Centre for Women & Co. team will be able to provide even more support to women and children experiencing or escaping domestic, family, and sexual violence. We'll also provide a women's health hub for the Logan area.

Saying thank you is never going to be enough to express our gratitude and excitement that we are able to provide amazing services to the Logan community and now be able to deliver them in this incredible building! The team and I are just beyond thrilled and honoured. So much hard work has gone into making this happen and we couldn't have done this without Shannon Fentiman, Cameron Dick, Mick de Brenni and our CFW Team!

We will move our Logan team by early July and advise partner organisations and clients of the new address upon settling in.

Stacey Ross
